

Siyabonga Shezi

Full-Stack Developer

Education

National Senior Certificate

Jan 2016 - Dec 2020

Sompukwane Secondary School, Durban

Mathematics, IsiZulu, English, Life Orientation, Geography, History, Life Sciences, Physical Sciences.

- Gained knowledge of physical and biological science principles through Life Sciences and Physical Sciences, fostering a methodical and experimental approach to programming.
- Built a comprehensive educational foundation that supports continuous learning and adaptability in fast-evolving technological environments.
- Studied historical and geographical contexts, improving research skills and the ability to manage complex information systems.

Renewable Energy Engineering

Mar 2021 - May 2023

Nelson Mandela University, Port Elizabeth

Renewable Energy Electrotechnology, Computer Studies, Language Studies, Applied Mathematics, Physical Sciences, MechanoTechnology, Renewable Energy Systems, Renewable Energy Projects, Solar voltaic Systems, Hydro Systems, Wind Energy Systems.

- Developed an in-depth understanding of the design, operation, and maintenance of solar photovoltaic systems, enabling effective implementation and troubleshooting.
- Gained practical knowledge in hydroelectric power systems including their engineering principles, environmental impacts, and integration into the energy grid.
- Learned to manage and execute renewable energy projects from conception to completion, focusing on sustainable practices and efficient resource utilization.
- Studied advanced electrical principles and their application in renewable energy electrotechnology for efficient energy conversion and distribution.
- Developed skills in the use of simulation software for designing and testing renewable energy components and systems.

Employment

Information Technology Enabler

Apr 2022 - May 2023

Edunova, Durban

- Facilitated the integration of IT solutions to enhance operational efficiency within various departments, ensuring seamless technology adoption.
- Provided technical support and training to staff, improving their proficiency with new IT systems and tools.

Blending operator

Sep 2024 - Present

Masa, Durban

- Operated and optimized blending machinery to ensure accurate mixing of materials according to production specifications.
- Collaborated with quality control teams to analyze samples and implement improvements in blending procedures.

Hobbies

- Coding
- Reading tech blogs
- Gaming
- Solving puzzles

- Monitored blend quality and adjusted process parameters to maintain product consistency and meet safety standards.
- Implemented health and safety protocols within the blending area to ensure compliance with regulatory and company standards.
- Developed and refined process documentation to standardise blending operations and facilitate training of new operators.

Achievements

- Collaborated with quality control teams to analyse product samples and implement process improvements, enhancing product quality and consistency.
- Designed, Developed and Developed full-stack projects.
- Engineered and deployed full-stack web applications integrating renewable energy data, enhancing operational insight and decision-making.

Certificates

Renewable Energy Engineering

May 2023

- Certified Renewable Energy Professional with expertise in solar, wind, and hydroelectric systems engineering.
